2. **CONSIDERATION OF:** Proposed Amendments to **NGC REGULATION 3.070, "MULTIPLE LICENSING CRITERIA"**, to establish that whenever a person who holds a nonrestricted gaming license, a license as an operator of a slot machine route, a license as a manufacturer or distributor, a license as an operator of an inter-casino linked system, or registration issued by the commission because of an ownership interest in one of these licensees, applies for a new nonrestricted license, or a registration or finding of suitability required because of an ownership interest in a nonrestricted licensee, the board and commission shall consider whether the granting of the requested action is in the best interests of the State of Nevada; to establish a definition of "market area" for use within this regulation; to establish the criteria that the board and commission will consider in making such a determination which may include but not limited to, the following: the number of additional gaming devices or table games that will be exposed, the total gross gaming revenue, the number of gaming devices that will be sold or distributed, the number of hotel rooms, employees and payroll to be owned, paid or controlled by the applicant and its affiliates; to establish that the board and commission may also consider numerous other factors including whether the requested action would result in the applicant and its affiliates having such a large share of the applicable market area that they become their own supplier of goods or services or have excessive bargaining power that allows them to dictate terms to customers or suppliers, are able to establish employment practices inimical to the welfare of gaming employees and the State of Nevada, are able to establish methods of play or artificially depress payout percentages in a manner that is inimical to the interests of consumers and the State of Nevada, are able to reduce hours or days of operation in a manner that is inimical to the economy in the applicable market area, as well as whether the proposed operation will consolidate or expand the applicable market area, whether competitors have a realistic ability to expand the applicable market area, whether competition from other market areas within a fifty mile driving distance substantially mitigates concerns regarding potential undue influence or excessive bargaining power, and any other factors that the board and commission may deem relevant; to establish a safe harbor provision which will allow applicants and their affiliates, unless otherwise required by the board and commission, to not have to comply with this regulation if they meet certain threshold percentages for revenue, gaming device exposure, sales and distribution on a state wide as well as applicable market area bases as reported in the State Gaming Abstract and Gaming Revenue Report published by the board; to provide that an application that involves a transaction that is subject to the Hart-Scott-Rodino Antitrust Improvement Act of 1976, as amended, (15 USC §18a), will not be considered by the Board or Commission until the applicant has received written notification from the appropriate federal authorities that the waiting period has been terminated; to take such additional action as may be necessary and proper to effectuate these stated purposes.
